

## Research team manager (various teams)

*The main goal is to lead your team in conducting LFP battery research, improving existing components, enhancing entire designs and functioning as a guide for your team*

### Your quests

- Be a professional authority to the other team members, but also organize them, overview day-to-day research activities of your team, suggest who will be assigned to which tasks and wisely use any unassigned time
- Work multi-functionally in order to develop prototype cell design (basically the whole battery) for high-volume pilot production
- Design, structure and plan experiments and lab work
- Overview and conduct research and experiments, analyze results, explain them and put them into the context
- Troubleshoot and solve complexed technical problems
- Coordinate activities with other teams and track their progress
- Talk to the elders in order to get new quests and receive EXP

### Teams

There are a lot of teams in ElevenEs, so you can tell us what are the best fits for you:

- Cell design
- Electrode research (cathode)
- Electrode research (anode)
- Electrolyte research
- Separator research
- Other/novel materials research
- Cell assembly
- Formation and testing

### You will also get

- Kick-ass management skill development program and all support you need
- A reasonable level of independence and influence
- A seat alongside founders in one of the fastest-growing and most promising companies on the market
- Opportunity to learn from the great management team and work with the most modern technologies
- Fair compensation and benefits increases
- Sense of pride for working in the only high-tech lithium-ion battery production company in the region

### Profile

State of mind: This will be fun to do and it will change my life

Must-have experience: In lithium-ion battery R&D

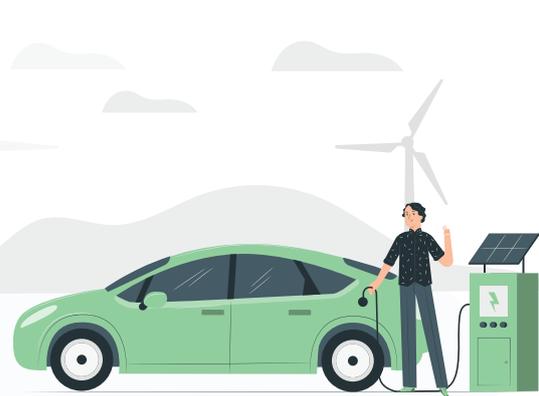

Nice-to-have experience: In LIB small or large scale production or preparing proof of concept LIB to be mass-produced

Organizational skills: Proven ability to organize and lead projects

Research experience: Been there – done that - maybe even managed that

Management skills: Willingness to learn and implement the given guidelines

The best possible skill to have: I can finish the project and create a working battery in less time than Tony Stark

Send us your LinkedIn profile or CV and motivation letter (we actually read those)
